- > Attractive Graphical User Interface with Touch Screen
- > Payment with Banknotes, Coins Proton, Bancontact,...
- > Optional Change given with Coin recycling
- > Very robust and reliable
- > Simple to use for both Users and Operators.

Applications.

The J400/G is the appropriate automat to buy any mix of tokens in a single transactions.

The product is very popular at exhibition parks, concerts, on cultural events, in swimming pools, ... typically in those applications where a service or product needs to be prepaid and where many people need to be served in a very short timeframe e.g. during the pause or at the start of the event.

When the tokens are sold at unattended places, when vandalism or attacks can not be excluded, the J400 can help you with a reliable, efficient, safe and permanent point of sales.

Modular Payment Options

The Antenor J400/G token vending machine can be configured to accept banknotes, coins, Proton, Bancontact, Credit Cards or any mix of these payment options.

The automat can be provided with the possibility to give change money out of 2 or 3 coin hoppers supporting coin recycling.

Every token can be configured with a separate price. Attractive bonus schemes and/or happy-hour prices can help increase revenue.

The optimal configuration will highly depend on the prices, the target environment and many other parameters. The consultants of Antenor can help you to configure the most adequate machine and can advise you with the design and purchase of the tokens.

Robust and Reliable

The J400/G is extremely strongly built to resist attacks and vandalism. Built as a safe, the cabinet is made of 4mm steel. The door is over 7mm thick including a brushed stainless steel front plate; it has hidden hinges and a safe lock mechanism with 4 strong bolts. The automat weights over 100 kg and is additionally fixed to the wall. All these measures contribute to a very safe and vandal resistant automat.

The J400/G is built based on the proven Antenor CPU-A controller and extensions together with an industrial PC which takes care of the GUI and LAN connectivity. All payment modules and accessories have been carefully selected by Antenor to assure the most reliable operation throughout its long life cycle.

User and Operator Friendly.

Thanks to a straight forward Graphical User Interface, a descriptive user guide and unambiguous icons, the J400/G will guide both novice and frequent customers to an efficient purchase. The user can select the language of his choice (French, Dutch, English). For a seamless exploitation, the C400 keeps track of all sales transactions. Statistics on products sold and money received by the different means can be showed on the screen provided the operator has the appropriate security key. Detailed log-files and reports can be obtained on a memory stick or can be requested using a web browser via the LAN interface.
